Requirements and Solutions

Are they all there? The FCI makes sure that no crate leaves production incomplete. Because of the diversity of different container and closure types, requirements develop that this system meets using an ideal combination of sensors.

Key Features

· Task-optimized choice of sensors depending on the pack and container types
· Attractively priced inspection unit
· Simple handling
· Hygienic design

Standard Equipment

· Stand and height adjustment
· Sensor types corresponding to the problem definition
· Innovative KHS image processing software

Advantages

· Attractively priced application
· Compact and space-saving system
· Wide range of applications
· Reliable technology
· Individual customization possible
· Reduction in customer complaints

Possible combinations
· Innocheck rejection systems
Service
· Worldwide service
· Holistic consulting and planning
· ReDiS remote maintenance
· Fast supply of spare parts

Technical Data
Maximum machine capacity
6,000 crates per hour
Protection class
IP 65
